

THE TOP MODEL FOR HIGH QUANTITIES

Stream finishing machine SF3 RLS

The SF3 RLS (Robot Loading System) features a modern tooling robot that performs all loading and tooling tasks. Even the highest numbers of cutting tools, forming tools and injection moulding tools can be deburred, rounded, smoothed and polished with this machine at the lowest possible cost and with the best results.

- Automated loading system by robot
- Maximum workpiece diameter 3 – 26 mm
- Maximum workpiece length 250 mm
- Adapter for collets with interface HSK available
- 3 independent lifting units
- A workpiece can be changed on one station while the other two are in processing
- Short changeover times and an extremely high output
- Ideal choice for handling even the highest quantities

Best tool performance
